КОЛЕННЫЙ БАНДАЖ С

ПОДДЕРЖКОЙ ПЕРЕДНЕЙ КРЕСТООБРАЗНОЙ СВЯЗКИ

OST 1098

ODZ 412

Designed to support the knee joint. Features an open patella design with a silicone pad for enhanced patellar stabilization. Medial and lateral spiral supports increase joint stability. Transverse straps designed according to the three-point pressure principle provide additional stabilization for the cruciate ligaments and patella

INDICATIONS

- Anterior cruciate ligament injuries and knee instability
- Patellar stabilization
- Meniscus lesions
- Post-traumatic and post-operative protection

UNIVERSAL SIZE

PATELLAR STABILISATION KNEE BRACE

PATELLAR STABILİZASYON DİZLİĞİ

СКОБА ДЛЯ СТАБИЛИЗАЦИИ НАДКОЛЕННИКА

ODZ 413

Made of neoprene fabric and anatomically designed for patellar stabilization. The special pad applies gentle pressure from the lateral side toward the medial side of the patella, helping stabilize the patella in cases of lateral dislocation or subluxation. The applied compression helps maintain the patella within the patellofemoral groove. Medial and lateral spiral supports enhance joint stability.

INDICATIONS

- Patellar instability
- Lateral patellar subluxation and dislocation
- Lateral patellofemoral compression syndrome
- Anterior knee pain

S	M	L	XL	2XL
31-34	34-37	37-40	40-44	44-48

PADDED SPORTS KNEE PADS

PEDLİ SPORCU DİZLİK
СПОРТИВНЫЕ КОЛЕННЫЕ ВКЛАДЫШИ
С МЯГКОЙ ПОДКЛАДКОЙ

ODZ 414

Designed to support the knee joint. Features a special pad around the patellar area for enhanced protection and stabilization. Helps maintain body heat and supports the healing process of the joint. Protects the knee against sudden impacts and shocks during daily activities and sporting activities

INDICATIONS

- Protection during and after sporting activities
- Protection against trauma

FUNCTIONAL KNEE BRACE

FONKSIYONEL DİZ BREYSİ

ФУНКЦИОНАЛЬНЫЙ КОЛЕННЫЙ БАНДАЖ

ODZ 417

unctional rigid knee brace made of lightweight aluminum and anatomically designed to fit the knee joint. Provides adjustable flexion limitation at 0°, 15°, 30°, 60°, 90°, and 120°, as well as extension limitation at 0°, 15°, and 30°. The four-point stabilization principle ensures maximum joint stability. Helps prevent anterior and posterior tibial displacement and protects against knee hyperextension

INDICATIONS

- Instability caused by collateral ligament rupture
- Conservative treatment of combined instabilities
- Isolated anterior cruciate ligament rupture or combined anterior and posterior cruciate ligament ruptures

LEFT / RIHGT

KNEE CAFE

DİZ KAFESİ
КОЛЕННЫЙ БАНДАЖ

ODZ 418

Designed for use in cases of knee recurvatum. Allows flexion while preventing hyperextension of the knee joint. Provides effective stabilization based on the three-point pressure principle.

INDICATIONS

- Knee recurvatum
- Hyperextension prevention
- Knee instability

S	M	L
31-34	34-37	37-40

IMMOBILISER KNEE BRACE

İMMOBİLİZER DİZLİK
ИММОБИЛИЗАТОР КОЛЕННОГО СУСТАВА

ODZ 419

Made of sponge-laminated fabric with a terry inner lining. Provides immobilization in extension and stabilization in the posterior, medial, and lateral regions. The removable design makes it ideal for knee injuries and post-operative use. Thanks to its three-panel pad structure, it can be easily adjusted according to knee circumference. Available in six different sizes

INDICATIONS

- Meniscal repairs
- Collateral ligament injuries
- Post-traumatic and post-operative protection
- Rehabilitation after plaster casting
