LUMBOSACRAL CORSET 32 CM

LUMBOSAKRAL KORSE 32 CM

ПОЯСНИЧНО-КРЕСТЦОВЫЙ КОРСЕТ 32 CM

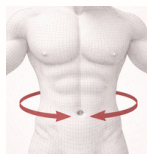

Made of breathable fabric with a corset height of 32 cm. Supports the waist and extends to the lower back. Features two plastic supports at the back and two removable steel supports along both sides of the spine. Dual cross straps extending from the back to the abdominal area provide additional stabilization to the lumbar region. Helps relieve pain by reducing pressure on the intervertebral discs and provides a sense of comfort and confidence.

INDICATIONS

- Herniated disc and osteoarthritis
- Sacralization and lumbarization
- Sacroiliac joint disorders
- Acute and chronic low back pain
- Post-operative rehabilitation

UNIVERSAL SIZE

UNI-THORAX CORSET

ÜNI-THORAKS KORSE

KOPCET UNI-THORax

OST 1075

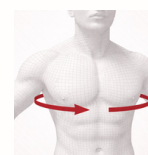

Corset designed to support the sternum area. Features two plastic supports at the back for enhanced stability. Shaped pads positioned on two aluminum supports in the sternal region provide effective compression and support. Side bands ensure an anatomical fit to the body. Two plastic buckles in the sternum area allow easy access for medical care without removing the corset during use.

INDICATIONS

- Rib fractures
- Post-operative rehabilitation of the rib cage

UNIVERSAL SIZE

PREGNANCY CORSET

GEBELİK KORSE
КОРSET ДЛЯ БЕРЕМЕННОСТИ

OST 1087

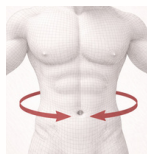

Made of flexible and breathable cotton fabric. Designed for use before and after pregnancy. During pregnancy, it supports the abdominal area and helps reduce lumbar and back pain. After childbirth, the wider section is worn at the front to support recovery and help prevent abdominal sagging.

INDICATIONS

- Support for dorsal and lumbar pain
- Prevention of abdominal sagging and deformation after childbirth

STD 1 (S/M)	70-90
STD 2 (L/XL)	90-120
STD 3 (XXL/3XL)	120-150

MAGNETIC WAIST CORSET

MANYETİK BEL KORSE
МАГНИТНЫЙ КОРSET НА ПОЯСИИ

OST 1085

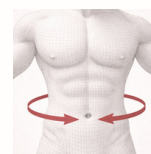

16 cm high corset designed to support the waist and lower back. Features four magnetic support pads at the back for enhanced comfort and stabilization. Dual cross straps extending from the back to the lumbar region provide additional support and stability. Helps support the recovery process during daily use.

INDICATIONS

- Acute and chronic low back pain
- Lumbar sprain and strain

UNIVERSAL SIZE

HERNIA SINGLE

FITİK BAĞI TEK Lİ
ГРЫЖА ОДИНОЧНАЯ

OST 1088

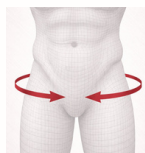

Made of flexible cotton fabric. Designed to apply pressure to the herniated area, helping to prevent recurrence and support the healing process. The buckle system allows easy application and removal. Suitable for comfortable use under daily clothing

INDICATIONS

- Inguinal hernia

RIGHT / LEFT

UNIVERSAL SIZE

HERNIA DOUBLE

FITİK BAĞI ÇİFT Lİ
ГРЫЖА ДВОЙНАЯ

OST 1089

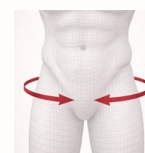

Made of flexible cotton fabric. Designed to apply pressure to the herniated area, helping to prevent recurrence and support the healing process. The buckle system allows easy application and removal. Suitable for comfortable use under daily clothing

INDICATIONS

- Inguinal hernia

UNIVERSAL SIZE

L.S.O CORSET
 L.S.O KORSE
 Л.С.О КОРСЕТ

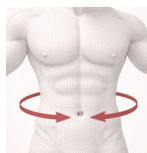

OST 1090

Made of sponge fabric with a laminated terry inner lining. Features one plastic support and two aluminum supports that provide rigid stabilization to the abdominal and lumbar regions. These supports help maintain an anatomically correct posture and enhance overall stabilization

INDICATIONS

- Lumbar vertebral fractures
- Post-operative rehabilitation
- Severe trauma

UNIVERSAL SIZE

T.L.S.O CORSET
 T.L.S.O KORSE
 Т.Л.С.О КОРСЕТ

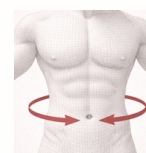

OST 1091

Body orthosis made of towel-laminated sponge fabric. Features plastic and aluminum supports that provide rigid stabilization to the abdominal and lumbar regions. These supports help limit spinal movements, maintain anatomically correct posture, and enhance overall stability. The aluminum bar in the sternal region restricts trunk flexion and provides effective immobilization.

INDICATIONS

- Severe trauma
- Vertebral fractures
- Post-operative rehabilitation
